## EDUCATION 2009 – 2013

### Amsterdam University of Applied Sciences

#### Course: Architecture Bachelor's Degree

Bachelor of Built Environment (BBE)  
Graduated: June 2013

Sep 2012 - Jan 2013:

Minor course: Working In The English Speaking World  
Some of the subjects: Economy & Business culture, Language Proficiency, Research. I wrote a research report entitled: "Study Architecture in London" after I went to London. There I focused on the differences and similarities between studying there and in the Netherlands.

Active member at the "**Architecture Association**" (**bouwkunde vereniging in Dutch**) which organized many events like architecture/museum trips to different cities in the Netherlands and also events like "architecture football competition" or "design competitions" for the students.  
The association is established in 2010 and has a growing amount of members each year.

Several times, I helped the study at **open days**. I gave information and answered questions from prospective students who were interested in the program.

2008 - 2009

### Amsterdam University of Applied Sciences Bachelor's programme: Civil Engineering

2003 – 2008

### Helen Parkhurst college Almere (Secondary school)

Diploma HAVO  
Subjects: Dutch, English, French, physics, mathematics, chemistry, economics, sociology.  
Graduated: June 2008

## INTERNSHIPS

Aug 2011 - Jan 2012

### Royal Haskoning Amsterdam, The Netherlands

Worked on several projects, such as:

- Dutch Embassy in New Delhi, India (making exterior & interior drawings)
- Hotel design in The Maldives (design a hotel which "Asia" is the concept)
- Fortress Vechten, The Netherlands (making an installations concept for heating, cooling and ventilation for an existing building)
- Water pumping station "Woudagemaal" in Lemmer, The Netherlands

I also did research on the material "bamboo" and wrote a research report entitled: "Using bamboo in the contemporary architecture"

## WORK EXPERIENCE

January 2014 - present:

### "De Alliantie" Housing cooperative Rent and housing advisor

- I give information to people who rent/buy houses that are owned by "De Alliantie", one of the largest housing cooperatives in the Netherlands. De Alliantie offer a wide range of houses which can be rented and purchased. Current and prospective tenants contact us for information and/or questions. There are several ways how they contact us, such as: Telephone, E-mail and Social Media. I give advice in several subjects as: home maintenance/renovation, offer of houses, nuisance, house prizes etc.

May 2012 - Oct 2012:

### UPC Netherlands Representative

- One of the main tasks was consulting to customers of UPC Netherlands, one of the largest cable operators in the Netherlands. The products this company sells are: telephone, internet and television. As a representative I helped customers solving problems they had and selling (updated) products. During my time at the company, I followed a training which was aimed on **sales and communication**.

June 2011 - Sept 2011:

### iCentre Apple Premium Reseller Salesman & advisor Apple products

- I followed several seminars about Apple soft- and hardware and especially the macbook series. Sales and advice of Apple products were the main tasks.

Nov 2008 – March 2010:

### Vroom en Dreesmann department stores Salesman at Travel & Luggage department

- Selling products, helping customers and advising specific luggage.
- Planning orders and intake of repairs.

## OTHER COMPETENCIES

Languages: English, Dutch, Kurdish

Software skills: Autocad Adobe Indesign  
Sketchup Adobe Photoshop  
Microsoft Office Adobe Illustrator

Hobbies: Football, running/biking, architecture, travelling, music

I'm a motivated and hard-working person who is always ready to develop. I'm capable of working in a team or independently in order to achieve the best results. During my study I have done good experience in different fields of "Architecture". The projects and trainings at university and the internship firm had different subjects, such as: desing/drawing, architectural details, urbanism, construction, building physics, installations, innovation of new architectural products, 3D model making (both computer and by hand) and more..

In the future my ambition is to develop myself, not only in architecture but the same for entrepreneurship and management. The combination of Architecture/Design and Entrepreneurship/Management is a great combination and it is beneficial for my future and career opportunities. One of my career goals is to use my technology skills in the financial industry.
