Profile

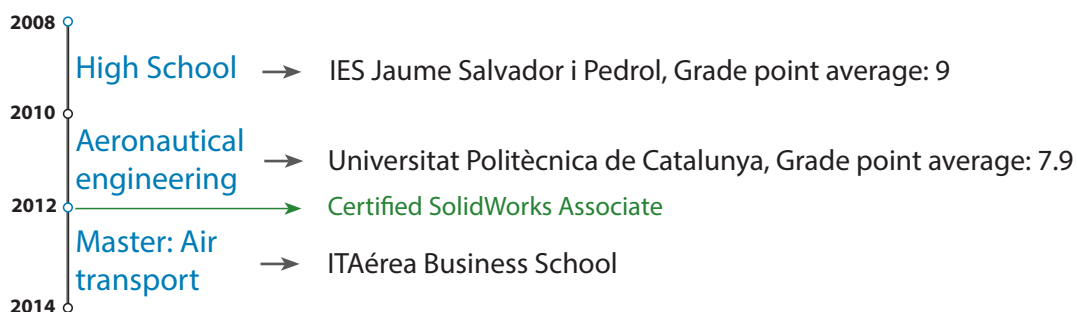

I'm an aeronautical engineering student with provision to face new challenges and to self-improve. I've always considered engineering as a fascinating field of study, it is also my hobby and my passion specially when it comes to automotion or aviation.

I'm a recent graduate and therefore, I consider that the moment has arrived to apply all the knowledge that I've been able to gather during these years.

Skills

Education

Work experience

Unpaid internship at the *Universitat Politècnica de Catalunya* developing air operations (**OPS**) projects. [6 months]

Air operations (**OPS**) department at Vueling Airlines. [4 months]
