WORK HISTORY:

• DINAMICA MEDIO AMBIENTAL SA (DIMESA)

2005/2012

Site manager, budgets controller and project engineer at the follow projects:

- **January 2011- June 2012.** Environmental recovery of the *Canal del Salobral*, next to the city of Albacete (Spain). The stakeholder of the project is the Environmental Ministry of Spain. The budget of the project was 1 million Euros. I've managed and supervised the works and budgets under supervision of the project manager.
- **August 2011-March 2012.** Environmental restoration of the Palancia River in the city of Sagunt (Spain). The stakeholder of the project is the Environmental Ministry of Spain. The environmental budget of the project was 300,000 Euros and I've managed and supervised the environmental works.
- **January 2010- December 2010.** Reforestation with Mediterranean tree species in the mountain of Los Llanos de Monte Mayor (Ayora, Spain). The stakeholder of the project is The Biodiversity Foundation which depends on the Environmental Ministry of Spain and the budget of the project was 400,000 Euros. I've supervised and managed the reforestation works and budgets.
- **March 2008- October 2010.** Reforestation of The Turia River Park between the city of Vilamarxant and the city of Valencia (Spain). The environmental budget of the project was 4 million Euros. The stakeholder of the project is the Environmental Ministry of Spain and I've managed the budget and the environmental works under supervision of the project manager.

- **October-November 2009.** Landfill restoration in a Military Base of Valencia. The stakeholder of the project is the public company TRAGSA, and I've supervised and managed the machinery and crews which carried out the landfill restoration.
- **October 2005- March 2008.** Reforestation Program on mountains of the forestry sectors in Valencia Region (Spain) .The stakeholder of the project is the Regional Government of Valencia (Spain) and the budget was 6 million Euros, so I've managed and supervised the production and the contractors of the project.
- **VYTRUSA** **2010**
My company (DIMESA) makes a new company with Fomento de Construcciones y Contratas (FCC SA), which is called VYTRUSA, to manage 200,000 tons a year of waste in several territories in Valencia region (Spain). Then, I was appointed project engineer to supervise and manage the environmental assessment of the landfill and waste treatment plant.
